ABOUT ME

Fullstack Developer with over 5 years of hands-on experience in web development, specializing in the modern stack of Next.js, React, and TypeScript. I possess solid knowledge of both frontend and backend development, and proven experience building complete, business-oriented applications. This includes developing a comprehensive SaaS business management solution featuring custom dashboards, automation workflows, inventory management, and integration with external APIs.
I am actively seeking my first formal professional experience to contribute significant value from day one and accelerate my career growth.

Portfolio inspired by Visual Studio Code.

EXPERIENCIA TÉCNICA

Controllity — Platform SaaS

Personal project | Fullstack Developer

- Complete development of a SaaS application for business management.
- Implementation of administrative dashboards, inventory management, supplier management, order management, and automations.
- Integration with external APIs (e.g., Mercado Libre).
- Design and development of the frontend and backend using Next.js, React, and TypeScript.
- Use of Prisma ORM and MongoDB for data management.
- Implementation of authentication, user roles, and business logic.
- Deployment and maintenance of the application in a production environment.

Other Relevant Projects

Personal project

- Development of web tools and interactive components using Next.js and React.
- Creation of user experience-oriented interfaces and dashboard design.
- Experience with version control (Git/GitHub) and best development practices. Development of functional clones of platforms such as Apple, Netflix, Nike, and others, focusing on advanced layout, responsive design, user interaction, and frontend architecture.

EDUCATION

high school diploma in programming

Instituto Remedios de Escalada de San Martín (2023)
Argentina
